

Portable Infrared Thermometer

Noncontact Temperature Measurement

SPECIAL

\$99

Reg. \$149

LASER SPOT TEMPERATURE GUN

ACCURATELY check the temperature of your textile equipment. Check conveyor dryers, transfer machines, moving parts and other hard to reach surfaces.

Aim at infrared panels to test "actual" surface temperature. Also check to see if one or more dryer panels are burned out on a conveyor dryer.

Shoot ink surface on garment just "before" it exits the dryer for a *TRUE INK SURFACE TEMPERATURE*. Make sure you are obtaining the correct curing temp.

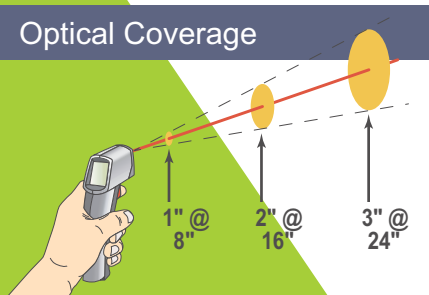

Shoot the surface of your transfer machine in several different spots to check uniformity of heat.

Hundreds of other uses: Check electric, gasoline & diesel motors for hot spots or diagnostic heat in specific areas. Check the temperature of your coffee after re-heating in microwave. Spot costly energy losses in walls with insulating deficiencies and windows for air leaks. Check air-conditioning units for actual cooling temp. Plus many, many many more uses.....

- Simple to use
- Instant readings
- Laser Pointing
- Easy to read display
- Temp. Range: 0° to 750°F
- °C or °F selectable

Buy one for the shop, one for home and one for the car!
